

# Spring Production

Ella, Willa, Marco, Levi

The 5<sup>th</sup> grade portion of the MDCS Spring Production Night was a fun experience for all ages. We used what we learned in school and some of us worked together and wrote the scripts. The rest of us followed the lead of the students who wrote our scripts.

We had two performances this year: The Dream of the Civil War, and The Digestive System. We reviewed what we had already learned in class or on field trips. The Civil War story was like a game show. The professor asked the questions and the soldiers answered them in teams. In the digestive script the students told and showed what happens inside the human body when we eat food. We all helped each other learn lines and we performed wonderfully. At times it was hard to write the script and learn the lines, but we all worked together to get it done. In the end we all had fun!
